Professional Summary

B.Tech Computer Science undergraduate specializing in Data Science and Artificial Intelligence, with internship experience in data analytics and application development. Skilled in Python, SQL, Excel, Power BI, data preprocessing, and exploratory data analysis. Building projects in predictive modeling, recommendation systems, and AI-assisted applications, with an interest in AI automation.

Education

B.Tech, Computer Science & Engineering – Data Science & AI 2023–2027
SRM University, Sonepat, Haryana **CGPA: 8.0**

Class XII 2023
Jaspal Kaur Public School, Delhi

Class X 2021
Jaspal Kaur Public School, Delhi

Experience

Data Analyst Intern Sep 2026 – Present
DevLabs Technology, Sector 63, Noida, Uttar Pradesh

- Work on data analysis, cleaning, preprocessing, and exploratory analysis to identify patterns and insights.
- Explore Python-based AI automation solutions to streamline repetitive tasks and improve workflow efficiency.
- Develop practical skills in AI tools, data processing, reporting, and data-driven business solutions.

Data Analyst Intern Jun 2026 – Jul 2026
DRDO – Defence Institute of Physiology and Allied Sciences (DIPAS)

- Cleaned and processed physiological datasets containing corresponding active and passive experimental files.
- Performed file-wise operations and comparative calculations across active/passive datasets.
- Developed a reusable Python/Pandas script to automate repetitive data-processing and calculation steps.

Technical Skills

Programming: Python, SQL, C
Data Analytics: Pandas, NumPy, Excel, Power BI, EDA, Data Cleaning, Statistics
Machine Learning: Scikit-learn, Regression, Classification, Predictive Modeling, Recommendation Systems
Visualization: Matplotlib, Seaborn
Tools: GitHub, VS Code, Jupyter Notebook, Netlify, Vercel

Projects

House Price Prediction *Python, Pandas, NumPy, Matplotlib, Scikit-learn*

- Developed a machine learning model to predict house prices using relevant property features and housing data.
- Performed data cleaning, exploratory data analysis, and feature preprocessing to prepare data for model training.
- Visualized data patterns and relationships to understand factors influencing predicted property prices.

MovieHub – Movie Recommendation System *Python, Flask, Scikit-learn, HTML, CSS, TMDb API*

- Developed a content-based movie recommendation web application using cosine similarity to identify movies similar to a user's selected title.
- Integrated the TMDb API to retrieve movie metadata and poster images, providing an informative user experience.
- Built the application using Flask with an interactive web interface for displaying movie recommendations.

Smart Civic Sense – Minor Project *HTML, CSS, JavaScript, localStorage, Vercel*

- Developed a civic issue reporting prototype that enables users to submit complaints using images, location details, and issue descriptions.
- Implemented issue classification, urgency analysis, location-based authority recommendations, contact lookup, and automated complaint generation.
- Deployed a single-page application on Vercel and used localStorage for client-side data persistence.

Car Price Prediction *Python, Pandas, Scikit-learn*

- Developed a machine learning workflow to estimate car prices based on relevant vehicle attributes.
- Applied data preprocessing and exploratory analysis, followed by model training to generate price predictions.
- Explored relationships between vehicle features and prices using a structured predictive modeling workflow.

Data Analytics Dashboards *Excel, Power BI, PivotTables*

- Created dashboards for student performance, Superstore sales, and HR analytics to monitor key performance indicators and identify trends.
- Analyzed approximately 10K Superstore sales records using Excel-based aggregation, PivotTables, and visualizations.
- Organized business metrics into visual reports to support trend analysis and data-driven decision-making.

Certifications

- Python for Data Science – IBM Skills Network / SRM University
- Machine Learning with R – IBM Developer Skills Network / SRM University
- Web Development – Udemy

Achievements

- Secured International Rank 1 and Gold Medal in the SOF Mathematics Olympiad (2022).
